## ADVERTISING RATES.

Transient Advertisements, 2 inches and under, 25 first insertion, and 50 cents each subsequent insertion. Over 2 inches, \$1 per inch for first insertion, and 25 cents per inch for each subsequent insertion. Special contracts with regular advertisers.  
Advertisements, in order to ensure insertion, should be sent in before noon of the day before publication.  
All Advertisements for insertion in the *British Columbian* must be paid in advance. Those for longer periods than one month are required to be paid each month in advance.  
All Advertisements, unless the time for which they are to be inserted is specified, will be continued until ordered out, and charged for accordingly.

## The British Columbian.

WEDNESDAY, AUGUST 12, 1868.

## THE RESOURCES AND PROSPECTS OF NEW WESTMINSTER DISTRICT.

Taking up this subject where we left off on Saturday, we may premise that the importance of sea and river fisheries appears to be strangely undervalued the world over. The great importance of fish as an article of food may be clearly shown by a comparison of the total supply of fish and beef to London in the course of a single year, as exhibited by the report of the Commissioners for the United Kingdom. "It has been roughly estimated," says the report, "that London consumes 300,000 fat cattle annually, which, at an average weight of six cwt. each, would amount to 90,000 tons of beef. It consumes annually about 80,000 tons of raw fish. This is irrespective of the vast quantities of herrings, sprats, shellfish, and other descriptions of fish which are supplied by other modes of fishing." Thus the weight of beef and fish consumed by the "beef-eaters" of London is in no great disproportion. But the price in that market is very different. The fisherman receives, on an average, little over 47 a ton for his fish, while the farmer is readily paid for his beef not less than £60 a ton! The produce of the sea fishing grounds bears a far higher proportion to that of the land than is generally imagined. Once in a year an acre of good land, carefully tilled, produces a ton of corn, or two or three hundred weight of meat or cheese. The same area at the bottom of the sea, on the best fishing grounds, according to evidence taken before the Commission, yields a greater weight of food to the persevering fisherman every week in the year! According to the report, five vessels belonging to the same owner, in a single night's fishing, have been known to bring in 17 tons weight of fish, an amount of good, wholesome food equal in weight to that of 50 cattle, or 300 sheep. When one considers the amount of care that has been bestowed on the improvement of agriculture, and the scientific knowledge and engineering skill which have been enlisted in its aid, it seems strange that the sea fisheries have hitherto attracted so little attention. But we must not forget that the more immediate object of the present article is to deal with our own resources. Taking up the question propounded in our last,—"Do not our fisheries bid fair to prove a failure?"—we unhesitatingly return a negative reply. The fisheries, like most of the other resources of the Colony, have not yet begun to be developed, can, in fact, scarcely be said to have been submitted to the test of practical experiment. Yet enough is known to justify our claim to the possession of the best fishing grounds on the Pacific. For extent and adaptability of our grounds and the quality, quantity and variety of fish that frequent our waters, we can certainly claim to be placed far beyond rivalry. As to the salmon, which may be taken as the staple here, we are quite aware that because the suckers were not so numerous last year as they were the year before, and because they are still less numerous this year than they were last, some are feeling discouraged. But, in order to get a fair view, take a look at the past ten years, and if we deduct the humpbacks and other species that are not considered first rate, we have still an abundance of A. 1 fish, and in a far greater variety

than can be found anywhere else on this coast. True, the demand for our fish has not been quite in keeping with the superior quality claimed for them; but that circumstance is very easy of explanation. The exports have not yet been sufficient to make our fish known in the principal markets; and of those sent away, many have been of inferior sorts, indifferently dressed, and badly cured, utterly unfit, in fact, for export, and thus serious injury has been inflicted upon the trade in its infancy, by avaricious and shortsighted men. But we have reason to believe that, in some important markets, a demand for our fish is springing up. In truth there need be no anxiety upon this point. A good article, properly cured, will always find a customer. With the undoubted, but, perhaps, more speculative, mineral wealth of the District we do not at present propose to deal. Looking, then, fairly, but briefly, at the whole, and keeping in view the great facilities we possess for shipping the produce of the country to all parts of the world, may we not ask with pardonable pride, where is there a District to equal this? With resources so rich, evenly balanced and varied; with inland navigation that cannot be surpassed; with ocean harbors of great excellence; with a climate pronounced by the best authority to be equal to the most favored parts of France; with very little wind; with just enough of rain (a saucy fellow at our elbow whispers, just a little more rain, if you please) to make vegetation grow luxuriantly without irrigation; with just enough of winter to recruit nature and afford those who are fond of it a merry sleigh-ride, yet so mild as to enable stock to pass the winter unhoused and unfed, and in some localities actually to come out rolling fat in the spring; with summers that bring Indian corn, tomatoes, tobacco, peaches, melons, grapes, etc., to the highest state of perfection, and afford the finest harvest weather in the world; with such natural advantages as these how can anyone doubt the great future of this highly favored District? Turning for a moment from the country to the town, is it not certain that in a District possessing such advantages and resources there must be at least one large town? And where, we ask, can that town be but just where it is commenced? If the selection were to be made now in reference to the future, we defy even the most bitter and implacable detractors of New Westminster to point out another site that could, either in intrinsic excellence or geographical position, for a moment compare with it. And if we take a larger and more distant view, and look at our position in a colonial and national aspect, every day's experience only tends more and more to vindicate and extol the wisdom and foresightedness of the selection of a site for the Capital of the British possessions on the Pacific. The agitation about the north coast routes may now be said to have blown its last bubble and spent its "bottom dollar." The last dying effort of the great enemy is now being put forth to stay Confederation. Should that effort succeed, our future as a British nation would be marred, if haply it would not be forever destroyed. But of such a result we cannot even entertain a fear. With a change of Ministry at home, Canada will have no difficulty in defeating such a monstrous fraud, and assuming the control of the essential middle link in the great Confederation chain. With Confederation complete, our troubles will end, and New Westminster will have an opportunity, for the first time in its history, of standing upon its own merits. If our friends at Yale feel elated, as well they may, at the prospect of Confederation and the certainty of the great overland road coming by their door, if they have a right to expect that their must be a large and important town, because it is situated on this road, at the head of river navigation, how much more have we a right to expect that New Westminster, situated on the same great river, at the head of ocean navigation and the terminus of overland travel, and surrounded by such a District as we have been describing, has a great destiny before it.

## The British Columbian.

WEDNESDAY, AUGUST 12, 1868.

**ECCLIASTICAL.**—Among the news brought out from Canada by the last mail, not the least interesting is the list of stations of the Wesleyan Methodist ministers for the Conference year. Looking to our own section, the Conference has thought proper to deviate from the recommendations of the District meeting, a thing that has never been done before, but which is sufficiently accounted for by the presence of Dr. Evans in Canada. As the matter now stands, the Rev. E. White, who has been laboring in this city and District with so much zeal and acceptance, during the past two years, removes to Nanaimo, the Rev. Mr. Browning coming here. The Rev. Mr. Russ comes out from Canada to supply Victoria. Mr. Thos. Crosby, who has been laboring for some years amongst the Indians at Nanaimo, with very marked success, has been received on trial by the Conference. These changes will, in all probability, take place in two or three weeks. We must not omit to mention, perhaps, the most pleasing feature of the matter, that the Rev. Mr. White has been appointed Chairman, which practically means, Superintendent of the work in this country. Mr. White has well deserved this promotion; and we must be excused for thinking that had it come years ago, it would have been better for the cause of Wesleyan Missions in British Columbia.

**FROM YALE.**—The Examiner of Monday affords data for the following:—Mr. J. Lawrence, late of Yale, has arrived from Oregon with 2300 sheep. He lost 300 on the mountains. An Oregon dealer brought about 175 head of cattle over and sold them at Osoyoos to Mr. Simpson. Amongst the freight taken up by the Onward on Thursday last were fifteen thousand four and grain sacks. Mr. Allison, of Rock Creek, has been over. He reports about 50 men; whites and Asiatics, at work mining and doing well. A few men were mining on Similkameen, making from \$5 to \$5 a day to the hand. About 100,000 lbs. of merchandise was forwarded out of Yale last week. A human body was reported a few miles above Yale, floating in the river. A Klutchan was drowned on Sunday, while crossing above Yale in a canoe.

**PAINTFUL RUMOR.**—Our Yale contemporary notices a rumour to the effect that a drove of 200 horses on the way to this colony, and belonging to Mr. Barnard, had been "stamped" by Indians. We sincerely trust that the rumor may prove to be false. Mr. Barnard has, we understand, gone over to the southern boundary. The band of horses numbered 350 when it left California. We are very much disposed, for various reasons, to discredit the rumor.

**SENTIMENTAL.**—It has been said, and well said, that "A thing of beauty is a joy forever." Nor do we doubt its truth. Never, we fancy,

"Never, though our mortal summers  
To such length of years should come  
As the many-wintered crow's that leads  
The changing rookery home,"

shall we forget the thrill of rapt admiration with which we gazed on the splendid display of Dress Goods on exhibition in the window of Messrs. Cline & Clarkson's store, Columbia St.

**GREEN CORN.**—We have to thank Messrs. Franklin & McClaren, Front street, for a bundle of green corn, large ears and well developed. They have a plentiful supply on hand from Mr. Veddar's ranch, Samass.

**APOTHECARY.**—We must crave the indulgence of our readers on account of our meagre columns this morning; the foreman of the office having been unwell for a few days.

**FROM VICTORIA.**—The str. Fly, Capt. Frain, returned from Victoria last night. She brought a number of passengers and a heavy freight.

## CARIBOO NEWS.

The str. Onward, Capt. Irving, returned from Yale yesterday, bringing a Cariboo express and mail, with files of the *Sentinel* of the 5th inst. There has been less activity in mining circles, owing to the short supply of water. Sixteen of the principal claims on Williams Creek yielded, for the week 7650z., the highest individual claim being the Taylor, 1300z. On Stout's Gulch 5 claims yielded 4410z., the highest, the Taftvale, being 1800z. On Mosquito Gulch 6 claims yielded 5380z., the Minnehaha topping the list with 2700z. On Grouse Creek the Flame co. washed up 4670z., while the Calveras, on Lowhee Creek, paid 1500z. From the other creeks there is nothing important.

**NEW STRIKES!**  
The *Sentinel* notices a number of new strikes. One at the foot of Red Gulch, where the Madoc co., at a depth of 102 feet, found as high as \$1.50 to the pan, on the bed-rock, accompanied by the most favorable indications. The second was on Stout's Gulch, by the Jim and Joe co., which caused much excitement and a great rush. The third was on Peters Creek, where a company working on a bench, got some 50z. of gold out of less than two yards square, one nugget weighing 2oz. Last, not least, a very important discovery of gold has been made on Peterson creek, by John Kennedy. The discovery claim, of which John is sole proprietor, is on a bench opposite the mouth of Bedford creek. Respecting this last discovery our mountain contemporary says:—The prospects are undoubtedly bona fide, and of such a character that their equal in richness in all probability has not been struck in the country since the discovery of Williams creek. Claims have been staked off on the main creek for about three miles, and also on some of its tributaries. This discovery will open out a large and long neglected auriferous district, and give employment to our surplus population.

**MISCELLANEOUS INTELLIGENCE.**  
In the case Regina v. Jas. Knight, for shooting, etc., the jury returned a verdict of "not guilty." Judge Begbie, in dismissing the prisoner said:—"Young man, you may consider yourself lucky that you have escaped, and I would advise you in future to leave your pistol at home. [The prisoner—'I intend to.'] In all my experience I have never found large men more quarrelsome than little ones, but quite the reverse. Men are like dogs somewhat: the smallest cur generally kicks up the greatest fuss. The large mastiff or Newfoundland dog, or even the bulldog, are not so troublesome and quarrelsome as the little cur. When I pass through Barkerville, I find all the dogs quiet until I get down by the blacksmith's shop, and there is a little black dog there that I will venture to say gets up more dog fights than all the rest of the dogs in Barkerville; and I am inclined to think this may be somewhat the case at Centreville. You may go your ways." A miner of the name of James Bennett, was killed by a cave in the Taftvale claim, on the 1st inst.

## TELEGRAPHIC SUMMARY.

European dates are to the 5th inst. The wheat harvest in the British Islands is over and the yield exceeds that of last year by one-third. The Times thinks the Commander of the Chanticleer should have sought redress through his own Government. Jeff. Davis arrived at Liverpool on the 4th. Queen Victoria arrived at Paris on the 4th, and was received at the station by the Empress Eugenie. An alarm of fire was given at the Music Hall, Manchester on the night of the 1st. Twenty-three persons, mostly women and children, were crushed to death, while large numbers had limbs broken and were otherwise badly injured. Affairs in Spain are very threatening and friends of the Government are becoming much alarmed. The United States news is to the 6th. An international Convention was held at Portland, Me. Delegates were present from all parts of the States and from Canada. The Convention was enthusiastic for international canals, international railroads,

and international intercourse generally—three continental railroads, one north, one south, and the great central route. The civil Government has been restored in Georgia, Alabama, and Florida. Rains are doing immense damage in Alabama, and worms are devastating the country.

Canadian dates are to the 5th inst. The anti-Unionists of Nova Scotia held firmly for repeal. The press is very bitter. The local Government(?) refused to have an interview with Sir J. A. McDonald, who was in Halifax.

**Our Fur Traders and Trappers** in fitting out here, find Ayer's medicines one of their most profitable articles of traffic. Around Slave Lake and the wild regions of the north, the Indians know their uses and have an abiding faith in them. They say "Ayer—great medicine—cure sick man," and his remedies, for the diseases from which they suffer, will often bring forth their stock of skins even quicker than wampum, rum, or tobacco. Savages are not fools if they are unsophisticated in some of the arts of civilization.—*Montreal Pilot*.

**HOLLOWAY'S OINTMENT AND PILLS.**—Sores, Wounds, and Ulcers.—Every variety of sore, ulcer, eruption, boil, and carbuncle, is safely stopped in its destructive course by the timely application of this healing Ointment. It arrests unhealthy, and substitutes healthy action, thus curing the inflamed, irritable, and spreading diseases affecting the skin. Holloway's Ointment has gained an imperishable fame for its facility in healing old inflammations, sores about the skin and sinews, and for bad legs and old wounds it cannot be equalled; nor is it less efficacious in gathering, breaking and abscesses. When the complaint has been of long continuance, Holloway's Pills will expedite recovery, if taken in those doses which act as alteratives on the stomach and bowels to the constitution.

## ALL OVER

## PLANTATION BITTERS.

Dyspepsia, with its symptoms, Headache, Heartburn, Fevers, Lipo, Bad Breath, Sallow Complexion, &c., can be cured by using PLANTATION BITTERS.

This is the most successful tonic of the age. Young, middle-aged and old, are delighted with its effects. The first trial always has a marked good effect.

Every change of diet is necessary. Eat all you wish, of the best and most nutritious food.

It is the greatest cure ever known for an overloaded and distressed stomach, which it relieves in a few moments.

We know that we have the best and most popular medicine in the world. We are not afraid to show what it is composed of, using PLANTATION BITTERS.

PHYSICIANS ARE COMPELLED TO RECOMMEND IT.

CALIFORNIA BARK has been celebrated for over two hundred years, and was sold during the reign of Louis XVI. King of France, for the cure of the plague of the West Indies.

It is remarkable for Dyspepsia, Fevers, Weakness, Constipation, &c.

DANIELSON.—For inflammation of the Lungs and Drastic Affections.

CHAMOMILE FLOWERS.—For indigestion.

LAVENDER FLOWERS.—Aromatic, stimulant and tonic—highly invigorating in nervous debility.

WINTERGREEN.—For Scarcia, Rheumatism, &c.

ANGEL.—An aromatic carminative; creating flesh, muscle and milk; much used by mothers nursing.

These clove-buds, orange, caraway, coriander, snake-root, &c.

They are recommended by the highest medical authorities, and are warranted to produce an immediate beneficial effect. They are exceedingly agreeable, perfectly harmless.

Notice.—Any person pretending to sell Plantation Bitters in bulk or by the gallon is a swindler and impostor. This put up only in our large glass bottles. Beware of bottles refilled with imitation, deleterious stuff, for several persons are already in prison. See that every bottle has our United States stamp over the cork unimpaired, and our signature on steel plate label.

Sold by respectable dealers throughout the habitable globe.

**P. H. Drake & Co.,** New York, Sole Proprietors.

**Redington & Co.,** San Francisco, Agents for California and Nevada.

**MEXICAN MUSTANG LINIMENT.**  
This liniment is well known. Its effects are instantaneous, soothing, and wonderful. Cuts, bruises, sprains and swellings, are so common, that it is in every family, that a bottle of this Liniment is the best investment that can be made.

It is more certain than the doctor—it saves time in using the doctor—It is cheaper than the doctor, and should never be dispensed with.

**READ THE FOLLOWING.**  
"I take pleasure in recommending the Mexican Mustang Liniment as a valuable and indispensable article for Sprains, Sore, Scalds, or Galls on horses. Our men have used it for Burns, Rheumatism, Sore, Rheumatism, &c. and all say it acts like magic." J. W. HARTY, Foreman for Amer's, Wells, Fargo's & Harnden's Express.

"The sprain of my daughter's ankle, occasioned while skating last winter, was entirely cured in one week after she commenced using your celebrated Mustang Liniment." Love Cloutier.

Alfred and sure it certainly is. All genuine is wrapped in steel plate engravings, bearing the signature of G. W. Westbrook, Chemist, and the Parvate U. S. stamp of Dexter Baxters & Co., over the top.

An effort has been made to counterfeit it with a cheap stone plate label. Look closely.

Sold by all Druggists and Stores, @ 25 & 50c, and \$1 in every cupboard.

**LYON'S MAGNETIC POWDER.**  
For exterminating insects and vermin, with entire satisfaction.

**COLEMAN & SUTTON,** Astor House.

S. T. COZENS, American Hotel.

ACKER & TRUBBELL, St. Nicholas Hotel.

S. LELAND & CO., Metropolitan Hotel.

Testimony of the character might be added to any length. Wherever it is used it advertises itself.

The genuine has the signature of E. LYON, and the private stamp of DEMAS BAXTERS & Co. Anything else of this kind is an imitation or counterfeit. Any druggist will procure the genuine if you insist you will have one.

Sold by all druggists and general storekeepers in every town and mining camp on the Pacific Coast.

## AGRICULTURAL EXHIBITION.

1868.

The General Committee of the New Westminster District Agricultural Society, having decided upon holding an Exhibition during the first week in October, now submit the following List of Articles for which Prizes will be given. They hope shortly to be able to announce the amount of such prizes.

All will be allowed to exhibit; but only Subscribing Members will be eligible to compete for prizes.

As it is desirable that the Exhibition should be rendered as complete and attractive as possible, any products of the Colony may be exhibited in quantities smaller than those prescribed in the list. Such articles will be entitled to Honorable Mention, if adjudged worthy.
